Profile

I am a highly motivated, self-disciplined individual with a strong desire to be a contributing member of your software development team. Currently enrolled in a full stack web development bootcamp to provide fundamental understanding of HTML, CSS, JavaScript and API consumption. This course offered by UNH will dive deep into topics such as Node.js, Express.js, SQL, NoSQL, and React.

While I acknowledge that this application may appear premature, I firmly believe that combining the skills acquired through daily participation in the bootcamp with an immersive plunge into this software development position will lead to success.
